

# Tough Situations

1. You and your best friend are at a small party with some kids that are older than you; towards the end of the night most of the older kids begin to smoke K2. Your best friend really wants to try it but wants you to try it also. The other people at the party tell you to not worry about it because they claim its fake weed and you can get in trouble for using it.

**What's your decision? What is a possible result from your decisions?**

Decision:	Possible Result/Outcome:
Get really upset that they even asked you to do something like that, say no, and leave the party.	
Let them know that you're not interested and tell them some facts about K2 Spice, like its illegal and you've heard of people going to the ER because of a bad reaction.	
Tell your best friend that you'd rather leave . its getting late and you have to get up early the next day.	
Come up with your own:	

# Tough Situations

2. Your favorite cousin came over to your house to stay the night. When your parents fall asleep your cousin goes into their luggage and pulls out a bag of marijuana and asks if you want to get high.

**What's your decision? What is a possible result from your decisions?**

Decision:	Possible Result/Outcome:
Say yes and try it out with your cousin.	
Tell your cousin no and give a reason why.	
Say no, go to bed, and talk to your parents about what happened the next day.	
Come up with your own:	

# Tough Situations

3. It's a Saturday night and all of your close friends are going to a party but the party starts after your curfew. Your parents have been sleeping for hours and you could easily sneak out of the house without them hearing you.

**What's your decision? What is a possible result from your decisions?**

Decision:	Possible Result/Outcome:
Decide it's not worth the risk of getting into trouble and decide to stay home from the party.	
Sneak out and go to the party.	
Don't go to the party and decide to talk to your parents about having a party at your house the next weekend.
